Low peel force for high
resolution prints

2GB of storage

Dual print areas on one
platform:
2 x (140 x 78 mm)

Full color capacitive
7-inch touchscreen

Preview prints on
console or browser
before printing

ACKURETTA

Diplo

Premium materials and robust engineering delivered in a compact design, the Diplo™ DLP 3D printer is built exclusively for dental applications. A dynamic system with dual-power capacity, the Diplo prints 20 dental models in 2 hours - over 200% faster than conventional DLP printers. Diplo helps you be more efficient; with wifi connectivity you can start, pause, and monitor prints anytime, anywhere.

splints

Open Material System

We understand that innovation comes with experimentation. Print with any SLA/DLP resin on a powerful UV projector, a powerful synergy of utility and accuracy unparalleled by any other DLP 3D printer.

Magics for Ackuretta™ and Magics for Ackuretta Pro™ are versatile, advanced data preparation software that allow the user to repair and prepare files for 3D printing. This robust software give users access to fast and accurate slicing technology and enhances the communication between software and 3D printer.
